# DEEP AND DARK WEB COURSE

LOOKING BENEATH THE SURFACE

## WHAT IS THE DEEP AND DARK WEB?

The World Wide Web is estimated to consist of over 130 trillion individual webpages and is constantly growing.

Only 4-10% of these webpages are found on the surface web and readily available to the public. The Deep and Dark web make up the remaining percentage. So, what can be found beneath the surface? Take our course on the Deep and Dark web to find out.

Our university accredited Deep and Dark Web course has been designed by academics and subject matter experts in cyber security and intelligence. The course provides insight into the Deep and Dark web and criminal activity found online, training in how to access the Dark Web safely and securely and the basics of cryptocurrencies, such as Bitcoin.

## WHO CAN TAKE THE COURSE?

- > Available to all members of the public
- > No entry requirements
- > No prior knowledge of the subject matter is necessary
- > Beneficial to many professions, from Law Enforcement to Fraud Investigation

**SURFACE  
WEB**  
4-10%

**DEEP &  
DARK WEB**  
90-95%
